

Sloth Facts

By Marnie

Sloth facts

1 Without sloths there would be no avocados because they have a digestive system large enough to digest an avocado seed whole they spread the avocado across a vast area.

2 Sloths are blind they completely lack cone cells in their eyes. As a result they are blind in daylight and can see poorly in dim light.

3 A sloth can host up to 950 moths and beetles in its fur.

4 It takes a sloth 30 days to digest one leaf.
